

PROJECT SYNOPSIS:

PROJECT:

- ❖ *Aimed to design and develop a software which keeps track of personal schedule and reminds the user (via Mail) at the given time.*
- ❖ *The functions that can be performed by this software are given below briefly.*

DETAILS:

- ❖ *Users will have access to the following functions:*
 - *To add a new task*
 - *To delete existing task*
 - *To edit any task*
 - *To view task (Completed/Pending)*
- ❖ *This software will store the tasks that the user feeds into it.*
- ❖ *The reminder option is optional.*
- ❖ *If the reminder option is enabled, the user will be reminded via mail and there will also be a popup reminder.*
- ❖ *In the add task option the user can select the start date and time and end date and time according to their will.*
- ❖ *There will also be a setting that allows the task to be recurring. [For example, setting a reminder for Wednesdays alone to take a lab coat for practical session at 7:00 a.m]*
- ❖ *The popup screen reminder will have a dismiss button and a snooze button which if snoozed will send another popup in the required time.(mail will be sent only once. When snoozed, mail will not be sent the second time.)*
- ❖ *The user will also be able to delete certain tasks.*
- ❖ *The user can view the tasks done or pending in a week wise fashion.*

DESIGN IDEA:

- ❖ *MENU:(This may not be the menu that is displayed. But all the functions will be covered)*
 - *Add task*
 - *Remove task*
 - *Edit task*
 - *View tasks*
 - *Pending*
 - *Completed*
